TYPE F25 FORM FORGED HIGH PERFORMANCE LIGHTWEIGHT

MiRO F25 is our latest addition to the MiRO line-up. Innovation & technology presents a "Form Forged" wheel constructed & designed for those that demand the highest performance while minimizing weight. The pressure used in this Flow Forming process changes the mechanical properties of the rim area gaining strength comparable to a forged wheel. The stiffness to weight ratio is spectacular and will deliver a high level of performance at a much lower cost than a fully forged wheel. MiRO F25 is built using the latest and advanced manufacturing technology. F25 is a next level choice for the ultimate quality & high performance wheel for your unique vehicle.

MiRO

TYPE 111

MiRO TYPE 111 is the flagship of our current lineup. Alluring and tasteful, the 111s are ready to add a touch of elegance and style to any vehicle.

MiRO TYPE 111 fits a wide variety of vehicles but not limited to European and JDM cars. We designed the Type 111 to be a dynamic wheel. In order to create a unique wheel, we combined design, style and performance while maintaining its contemporary looks to accommodate enthusiasts that only seek top of the line aftermarket wheels.

Installed in a European car it becomes one with the vehicle. MiRO TYPE 111 becomes part of the performance and style that European cars are known for.

JDM enthusiasts can achieve a true after market custom look with MiRO type 111. It offers a high end appearance with true styling guaranteed to enhance the aesthetics of any vehicle.

TYPE 398

DRIFT STRENGTH

Lightweight and strong, the MiRO TYPE 398 is popular among the after market enthusiasts. The 398 adds a custom high performance look that is easily distinguishable and recognizable. 398 is offered in two color options, matte black and full silver. Popular among JDM after market enthusiasts, 398 is a top choice for enhancing and elevating your custom vehicle.

The new MiRO TYPE 563 is the ultimate wheel upgrade for your performance vehicle. Aside from having deep concave spokes, the 563 is also lightweight and clears large brake calipers. A winner among its class.

JDM

22 YEARS OF DEDICATION

Since 1995, our company has been distributing and promoting aftermarket alloy wheels, earning quite a reputation among car enthusiasts. Our wheels are manufactured to meet stringent quality standards. Each model is designed with performance enhancement in mind. Precise fitment is always guaranteed. Our 22 years of experience and expertise are what keeps our customers loyal and it is how we earn their trust. Think premium quality wheels, choose MiRO.

ENGINEERING + DESIGN

MiRO has a history of quality and craftsmanship. We engineer our wheels to be strong and lightweight. We meet & exceed the demands of the daily driver as well as the high performance race car that pushes the limits & boundaries of our wheels. Our wheels always deliver & perform consistently & efficiently. Our wheel design can fit a vast selection of cars, from JDM, EUROPEAN, EXOTICS & everything in between. We clear large brake calipers with options for staggered stance or a more OEM fit. We invest & focus in R&D & publish our findings in our online Application Guide which contains thousands of vehicle applications & fitment. We offer customer support for any fitment questions.

WARRANTY

All of our wheels are VIA | JWL certified and covered with a limited one year factory warranty. Restrictions apply*.
